REF: CERT2012.BFCasino.Aug-Oct2012

Return to Player (RTP) Report of the independent testing agency¹ of Betfair Limited who are the operators of online gaming site www.betfair.com.

We have examined the data log files for casino games for the months of August - October 2012, as recorded by the computer systems of www.betfair.com. The scope of this review did not include any reviews of financial controls or back-office procedures, including those relating to amounts received from, or paid to, clients of www.betfair.com.

The average RTP, being the percentage of winnings to turnover², as shown by the data log files for the following categories was:

Slot Machine Games	93.79%
Table Games	96.97%
Card Games	98.07%
Video Poker Games	99.12%
Fixed Odds	98.08%
Scratch Cards	93.14%
Live Games	97.83%
All Games	97.17%

The RTP is within the bounds of expectation of appropriate gaming performance by www.betfair.com during the analysis period. These RTPs do not necessarily reflect the results of any individual game; instead they represent the payout percentage within the category of www.betfair.com. These values are based on historical records and do not necessarily represent expected future payout.

In our opinion, these RTPs have been correctly calculated based on the amounts wagered and the winnings during the stated period.
